MEDICAL CARE FOR THE WORKING MAN

We are excited to offer medical care for working men beginning in January 2021! We have two locations to serve you and can also do online visits. On your first visit we will do a health screening and may order labs to check your cholesterol, liver, kidneys, thyroid and prostate. Don will address your current health problems and assess for future risks. He may prescribe medications to reduce your risk of problems such as Coronary Artery Disease and Stroke.

We are also thrilled to be able to add an additional member to our team! Jezzel Amor Ocana has worked along side us on Medical Missions in the Philippines for many years. She joins Shyne Amor as a Care Coordinator for our practice. She brings technical expertise to the practice as well. As all of our team members, she has been HIPAA trained and will receive additional training as a medical scribe. We welcome you, Jezzel, to our growing practice.

2021 marks a year for our practice. We have provided **Occupational Medicine** and **DOT Physicals** to hundreds of patients and in doing so have made hundreds of new friends. We have welcomed each and every one of you into our home. We have bartered services with you and given free care. We have been available to you by phone or messaging 24/7. **In a perfect world, we believe all medical care should be like that. And we will never change.**
